School Based and Community Based Oral Health Services

Closing barriers, Using Resources, Increasing health, Focusing on learning

Everyone knows that treating cavities leads to better overall health, but did you know it is also one of the leading reasons kids **miss** school and that it can even lead to decreased concentration at school and lower test scores?

Tooth decay is now reported to be the **most common chronic childhood illness**, with 51 million school hours lost to dental-related illness each year. Poor children suffer the most with twice as much tooth decay as their more affluent peers and the poor are less likely to have health and dental insurance.

Six month or yearly scheduled **School Exams**,
Cleanings, Fluoride, Sealant Program

Option:

Dedicated Onsite Case Management. We call parents to help them find the care they need for their children.

Option:

Dental Clinic Days
Onsite is one of the only school programs able to provide care **ONSITE** to students who sign up with parent consent. All parents are called and involved in all dental care and parents don't have to miss work

Option:

Plan a Ronald McDonald Caremobile Day. The Caremobile is grant funded and provides **FREE** dental care for kids with no insurance!!

Option:

We can refer to our home clinics at local health departments and clinics.

Patient-focused care with options schools need.

Our programs are completely free, **EVERY** child gets a dental exam regardless of insurance.
